**5. Fire Fighting Measures****5.1. Extinguishing media**

**Extinguishing media:** use dry chemical CO<sub>2</sub>, water spray (fog) or foam.

**5.2. Special hazards arising from the substance or mixture**

**Exposure hazards:** Highly flammable liquid. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard.

**5.3. Advice for fire-fighters**

**Advice for fire-fighters:** Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

**Special protective equipment for fire fighters:** Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

**6. Accidental Release Measures****6.1. Step to be taken in case material is released or spilled**

Remove all sources of ignition and ventilate area. Wear appropriate safety equipment as listed in Section 8. Absorb on inert material, then place in a chemical waste container. After removal, flush contaminated area with water and collect for disposal. Clean up spills immediately. Obey relevant local, state, and federal law regulations. Do not contaminate any lakes, streams, ponds, groundwater or soil. Dispose and report per regulatory requirements if necessary. Please prevent washings from entering waterways.

**7. Handling and Storage****7.1. Precautions for safe handling**

**Handling requirements:** Keep away from heat. Keep away from sparks, flames and other sources of ignition. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Store in well-ventilated area. Use explosion-proof equipment. Wash thoroughly after handling. Follow all MSDS/label precautions even after the container is emptied because it may retain product residues. Wash thoroughly after handling.

**Other Precautions:** Avoid ignition sources or excessive temperatures. Heat can induce polymerization with rapid release of energy. Closed containers may rupture explosively.

Initial date: 3-11-2017

Spontaneous polymerization may occur with prolonged aging.

**7.2 Conditions for safe storage, including any incompatibilities**

**Storage conditions:** Store between the following temperatures: 13 to 27C. Store in accordance with local regulations. Store in a segregated and approved area. Store in cool, well ventilated, dry area. Keep container tightly closed. Maintain air space inside storage containers.

**8. Exposure Controls / Personal Protection****8.1. Control parameters**

**Workplace exposure limits:** Not applicable.

**8.2. Exposure controls**

**Engineering measures:** Use process enclosures, local exhaust ventilation or other engineering controls to control airborne exposure. Use explosion-proof ventilation equipment.

**Respiratory protection:** Wear an appropriate, properly fitted respirator (NIOSH/MSHA approved) during application and handling unless air monitoring demonstrates vapour/mist levels below applicable limits. Follow respirator manufacturer's recommendations for selection and use.

**Ventilation:** Sufficient ventilation must be provided to maintain airborne concentrations below TLV, PEL and LEL limits as listed in Section 8.

**Hand protection:** Chemical resistant protective gloves should be worn when handling this product. Check with glove manufacturer to determine proper glove type.

**Eye protection:** Splash-proof chemical goggles should be worn

**Skin protection:** Impervious clothing and boots should be worn. Eye bath and safety shower should be provided.

**Hygienic practices:** Good personal hygiene practices are required at all times when handling chemicals. These practices include, but are not limited to, washing when safety equipment is removed, at the end of each shift or when going on breaks and especially if contamination occurs.
